Our partition series is a unitized wall system that offers complete modularity, ensuring cost effective movement for the lifespan of the product. Transparency has become an architectural pleasure. Its transparence elegance provides high quality appearance and creates attractive rooms with clear views. Combine with the latest science, technology and engineering in every step of the manufacturing process, the quality of our products is continuously improved.

Certified Fireproof Performance and Structural Test

FILING FILE PROOF

Stage 1

Stage 2

Stage 3

Contents inside all drawers remained intact

Safes are precisely engineered to surpass the strictest industry standards. Our seamless construction approach eliminated all the vulnerabilities found in older design, locking your valuables even more securely than ever. Our premium formulated ultra fine bubble concrete provides the most effective insulation against intense heat.

The safe was placed in an air-tight gas furnace and subjected to intense heat of 1010 C (1850 F) for 120 mins. The impacted safe was subjected to another round of intense heating at 843 C (1550 F) for half an hour to test its structural integrity.

The impact test gives extra assurance that the drawers will not jar open, if the cabinet falls through a floor or is hit by falling beams or debris.

SAFE'S

While the safe was red hot, it was dropped from a height of 4 metres onto hard ground to simulate the combined effects of heat degradation and impact.

We subject our BOSS safes to the most rigorous tests to ensure they perform faultlessly under all conditions. One of our tests simulates the worst case scenario of a safe in a fire, falling through the floor it rests on, and being subjected to another round of intense fire after the impact of the fall.

Some of the metal fittings on the external door melted due to the heat but the contents and interior of the safes remained perfectly intact. The internal temperature peaked at 120 C, well below the paper tolerance level of 177 C. In fact, the colour of the paper remained unchanged.

PARTITION

Our partition series is a unitized wall system that offers complete modularity, ensuring cost effective movement for the lifespan of the product. Transparency has become an architectural pleasure. Its transperance elegance provides high quality appearance and creates attractive rooms with clear views. Combine with the latest science, technology and engineering in every step of the manufacturing process, the quality of our products is continuously improved.
